NEVER WON A CONFERENCE!

We believe it was the late Will Rogers who once remarked that the United States never lost a war or won a conference! There's just enough truth in that to curb any rising hope that another conference with Russia will yield lasting results favorable to us.

"GIVE-AWAYS"

The desire to get something for nothing lies close to the skin. It doesn't need much encouragement to come to the surface. So we view with a measure of satisfaction that some limits are likely to be placed on radio "give-away" programs. The thing was rapidly getting out of hand. The way to win a vacation, an automobile, a fur coat or other things of value is to work and save for them. Radio can be a factor for good in our national life, but surely not by encouraging and cultivating an attitude of seeking "give-aways."

AIT TO BE CLOSE

Roanoke Times

With 246 members as against 187 Democrats and two Wallaceites, the Republicans appear to be in no great danger of losing control of the House this year, thinks Columnist Jay G. Hayden. Not only simple arithmetic but the existing political situation supports Mr. Hayden's conclusion.

But the situation is quite different when it comes to the Senate, where the Republican margin of control is exceedingly slim, in fact, that the control of the next Senate will pass to the Democrats if they can unseat four or five of the six Republican incumbents who are in serious trouble this year.

Nothing short of a landslide can restore the Democrats to power in the House. And if there should be a landslide this year it is far more likely to be a Republican landslide than Truther way around. But when it comes to the Senate, the Republicans have a real fight on their hands to preserve their slim majority and if they run into reverses such as threaten to overtake them in Kentucky, Oklahoma, West Virginia and several other States, their numerical margin of control may be wiped out in November.

It could very well turn out that the Democrats will lose the White House and fail to regain control of the House this year but return to power in the Senate. The fight for control of the Senate in the 81st Congress may develop into an exceedingly close contest and as of the present time the uneasiness of the Republicans seems thoroughly justified.

SOME FACTS ON NEGRO VOTING

Petersburg Progress

Assuming that facts may still be discussed while a civil rights 'program' commands so much political attention, it is interesting to note the findings of a survey on Negro voting published by the Southern Regional Council and prepared under the direction of Dr. Luther P. Jackson of Virginia State College. According to a summary, the report states that the number of qualified Negro voters has tripled since 1940 and that it is highly improbable this progress will wane. During the same period the number of qualified white voters has increased and at a faster pace in most states, "so the developments of the 1940 decade represent not a fulfillment of political equality but only a beginning toward its realization."

Any investigator, according to Dr. Jackson's report would feel encouraged as he passes through Virginia, North Carolina, Georgia, and Florida; would lose enthusiasm as he passes through Alabama, Mississippi, and Louisiana; and would revive his enthusiasm on striking Texas, Arkansas, Tennessee, and Oklahoma. This in itself is a reminder of the variations to be found on the southern scene which are lost sight of in many of the generalizations. For example, Negro participation in Democratic primaries has long been the case in Virginia and still a bitter issue in certain states. The report goes on to note that in many cities Negroes have sought public offices without reprisals and in a few instances have won seats with considerable support from white voters.

HIGHER VACATION COSTS

Winchester Star

Inflation and taxes— the Killjoy twins— have boosted the cost of your 1948 vacation as much as 100 per cent compared to 1940, according to the family economics bureau of a large life insurance company.

A 12-day cruise from New York City to Nassau, Havana and Miami cost as little as $120 in 1940; today the same cruise costs $218.50 minimum, an increase of 82 per cent. Nearly a third of the increase is transportation taxes, all added since 1940.

A 12-day all-expense railroad tour from Chicago through Glacier and Yellowstone National Parks cost $176.13 in 1940; the tour takes 11 days in 1948 and costs $291.95, up 66 per cent with transportation taxes accounting for nearly a fourth of the increase. Allowing for the shorter duration of the trip in 1948, the cost per day is up approximately 80 per cent.

Round trip airline fare, Chicago to Los Angeles or San Francisco, was $119.95 in 1940; the same ticket today costs $221.82, up about 58 per cent. Of this increase over one-third is due to transportation taxes.

Although the transportation tax is bypassed when the family automobile is pressed into service, other price and tax increases are encountered. The motor tourist in 1940 could usually get a room with double bed and shower in a good motor court for $2.50 or $3 for two persons. Today he will pay $4 or more. He could get a room and bath for two in an average size city for $4 or $5. Today he pays $8 per cent more. Meals have approximately doubled in price.

Gasoline is up 40 per cent, compared to 1940 figures, part of the increase being attributed to increased state taxes. Auto repairs cost twice as much as in 1940.

Perhaps these figures explain why more tourists than ever are on the roads this summer. People have decided that something that is as expensive as vacations have become must be worth while.

IMMORTAL SHORTSTOP

Chicago Daily News

Joe Tinker has passed to his final home but the legends about him will never die while umpires still cry, "Play ball." He was the shortstop of an immortal double-play combination. People who never saw the trio in action are familiar with the phrase, "Tinker-to-Evers-to-Chance." Chicago's Cubs' diamond was the scene of Tinker's triumphs from 1902 to 1912. Fans will keep his memory green, with that of his departed teammates, as long as they gather in stands and bleachers in summer and around the hot stove in winter.

THE BERLIN AIR LIFT PROVIDES FRESH ENCOURAGEMENT

Baltimore Sun

In his dispatch fro mFrankfurt, Mr. Gerald W. Griffin, a staff correspondent of The Sun, explains vividly the immensity of the task of supplying the Western sectors of Berlin by air pointing out that this is roughly the equivalent of supplying Washington and Baltimore from New York.

Such a task had never been undertaken before. Consequently, nobody could say whether it was practicable over an length of time. But, after several weeks of actual experience, officers of the United States Air Force and the Army Transportation Corps now state confidently that the tonnage flown can be increased substancially and that the air lift can be maintained indefinitely.

Their contention is that this is a simple matter of arithmetic, depending upon the number of planes made available. British and American planes combined are now bringing over 2,500 tons of supplies daily. Of this total, 50 United States four-motored ten -ton C-54's account for 1,000 tons. Add 50 more C-54S and the daily total would be increased by 1,000 tons. The planes are supplying not only food but coal. The airmen do not believe that winter weather will interfere with the daily average.

Prudence suggests that allowance be made for the enthusia mof airmen over ,lat planes can do. Yet already the air lift has accomplished far more than nfany imagined to be possible. Before, before his return from Washington to Berlin, Gen. Lucius D. Clay substanciated the claim. He indicated that more C-54's would be made available and said that the proposed new airfield would permit expansion far beyond even the present goal of 4,000 tons daily.

Andrew, The Man Who Brought Others

Lesson for August 15, 1948

Dr. Newton

MEET Andrew, brother of Simon Peter, fisherman of Galilee. Follow his career and you will account him one of the truly great men of the ages, chiefly because he was ever alert to help men on to God. He was always introducing his friends to Jesus.

There are many passages of scripture cited for this study, with the devotional reading in Luke and the Golden Text from John 1:42: "He brought him to Jesus."

* * *

WHAT ANDREW TOLD HIS FRIENDS

WHEN Andrew met Jesus, and discovered in him the Saviour of men, he went and found his brother, Simon, and said unto him, "We have found the Messias, which is, being interpreted, the Christ," John 1:41.

What do we tell our friends? Do we not delight to tell our friends what we have found to be good? This was the mission of Andrew, telling his friends about Jesus, for he had found in Jesus that which was good. John the Baptist had told Andrew about Jesus, and he was determined that he would tell everyone who would listen to this good news.

* * *

HOW ANDREW KNEW ABOUT JESUS

ANDREW got his impressions of Jesus firsthand. When he heard John the Baptist say, "Behold the Lamb of God that taketh away the sin of the world," he went on to inquire about Jesus, and Jesus bade him and John spend the day with him. They did, from 10 o'clock in the morning until late afternoon. That was enough. Andrew knew from that day about Jesus. He was now ready to tell others what he knew about Jesus.

Do we know Jesus well enough to tell others about him? If a fisherman could tell the story effectively, why cannot everyone? But let us remember this, no man can introduce his friend to Jesus until he himself knows Jesus.

* * *

THE MAN WHO BROUGHT OTHERS

LET'S look for a moment at some of the people Andrew brought to Jesus. We begin, of course, with Simon, his brother. Here, I think, is the highest test of his ability to tell others about Jesus—bringing his own brother. It is often easier to tell strangers about Jesus than those of our own family.

And now we see Andrew yonder in the multitude, finding the lad with the loaves and fishes, and bringing him to Jesus. That is the test of seeing the right person at the right time. And again this is the acid test of introducing people to Jesus.

Again, we see Andrew sensing the fact that some young Greeks had come a long way to see Jesus. He knew how to help them. In this incident we see the final example of winning people to Jesus—cultured Greeks, who were familiar, we may assume, with the current thought of the world. But this simple fisherman of Galilee knew how to approach them, how to gain their attention, how to bring them to Jesus.

* * *

THEY WAIT FOR THE ANDREWS TODAY

THE world waits for some Andrew today. I fully believe that most people could be won to Christ if only there were enough Andrews. Rarely have I had a person to repel me when I faithfully followed the leading of the Holy Spirit to speak to such person about Jesus.

Andrew did not rely upon his own resources. He went in the might of the Lord. He knew what Jesus had done for him. He yearned to see all men enjoy their blessing. He was a simple messenger—a voice.

And God gave him words—words that fell like good seed into fertile soil. So may we today introduce our friends to Jesus: Only let us remember this—we must first know him!

LOW GRADE APPLES ADVISED FOR FARM USE

Channeling low- grade apples from this year's crop to farm use has been suggested by Extension Service specialists as one of the most important steps in wise distribution of the fruit.

Low-grade apples on the market result in low prices, they explain. In a list of recommendations prepared jointly with the Virginia Division of Markets, the specialists say:

Watch harvesting maturity dates so apples will be picked when mature but not over-ripe.

Conduct all handling operations carefully and avoid bruising. Consumers hesitate to buy apples that show bruises.

Inspect each grader carefully. Grading is believed to be the most common source of apple bruising.

After apples are harvested, handle as little as possible; and if they are not to be marketed immediately, put them under refrigeration.

Be sure the top of basket apples are representative of the apples underneath.

Year's traffic toll in Virginia is near the 400 mark.

Virginia's population is estimated to be 2,999,000.

Can Black-Draught Help An Upset Stomach?

Yes, Black-Draught may help an upset stomach if the only reason you have an upset stomach is because of constipation. Black-Draught, the friendly laxative, is usually prompt and thorough when taken as directed. It costs only a penny or less a dose. That's why it has been a best-seller with four generations. If you are troubled with such symptoms as loss of appetite, headache, upset stomach, flatulence, physical fatigue, sleeplessness, mental haziness, bad breath—and if these symptoms are due only to constipation — then see what Black-Draught may do for you. BIRTHDAY CELEBRATION

Oakville, Aug. 11.- On Sunday, August 1, friends and relatives gathered in the home of Mrs. Esmonia Martin to celebrate her 78th birthday with a picnic lunch. In the afternoon many group pictures were made. As rain began to fall, the birthday cake and others were passed to the porch. While the rain fell, many friends talked with friends and Mother Martin opened the shower of gifts, which were many and useful. Then she cut the birthday cake, made and donated by her granddaughter of Roanoke, Mrs. Dorothy Johnson. After this refreshments were served and enjoyed, and between showers the crowd left for home with fond memories of "Grandma" and the good times at her home.

Those present were as follows:

Mr. and Mrs. Joe Martin and Josephine, Mr. and Mrs. Ashby Martin, Mr. and Mrs. Gibbs Martin and family; Leonard Martin, Gertrude and Pete; Mr. and Mrs. H. O. Thirteen-Year-Old Mystery Still Puzzles Sheriffs

EL PASO, TEX. — Somewhere in the eroded butte country of eastern New Mexico there are the bones of four people—two men and two women who disappeared 13 years ago while on a trip to the West coast.

Mr. and Mrs. George Lorius of East St. Louis, Ill., and their traveling companions, Mr. and Mrs. George Hebere of DeQuoin, Ill., spent the night of May 21, 1935, in Vaughn, N. M. They apparently reached Albuquerque, N. M., where postcards bearing their handwriting were mailed the next day.

There the trail ended. The Lorius' 1931 model automobile, save authorities their only clew. A nervous young man with a prominent adams apple abandoned the car in Dallas after passing through El Paso. He left a trail of Lorius' travelers' checks before he disappeared in Dallas.

Texas and New Mexico sheriffs in this sparsely populated country have doubted that the party was murdered. Murder, however, can't be proved until the body is found and there has never been a trace of the Illinois couples.

Radio Device Helps Baby Sitter Care for Children

SHANKS VALLEY, N. Y.—A radio baby sitter for student veterans living here has been put into operation by Maj. J. L. Wood of Seattle.

It enables one baby sitter to take care of a number of children in their own homes on such occasions as community dances.

Maj. Wood is living here with his wife and two children while studying at Teachers' college. Before he entered the army he was in commercial radio.

His procedure is to place a microphone near the crib of each baby to be watched and connect it to an amplifier in his own home.

Each amplifier is labeled with the name of the baby being watched. In each home he also places an alarm clock near the baby so that if its ticking ceases the baby sitter will know that the radio device is no longer working.

The microphone is so sensitive that it will even transmit the sound of the child's breathing.

Thief Apologizes, Returns Loot; Identity Kept Secret

TACOMA, WASH.—Police were puzzled about whether or not to continue search for a bandit who held up and robbed an ice cream store of $90 here, then, hours later, changed his mind and returned the money.

Mrs. Edyth Easton, victim of the robbery, told officers the robber called her up and apologized for taking the money. She said she then urged him to return it saying she would not reveal his identity to police. He returned the money and she kept her promise.
